

Platform Engineering Solution

STACKTIC

Full-Stack Automation from Planning to Production

Speed of managed services. Control of open source. Complete sovereignty.

70%+

COST REDUCTION

80%

FASTER DELIVERY

Zero

VENDOR LOCK-IN

100%

DATA
SOVEREIGNTY

The Market Shift

Enterprises are prioritizing data sovereignty and AI readiness over vendor convenience

Growth Trends

AI Open Source Adoption **35%**

Fastest growing segment in enterprise tech

Kubernetes / OSS Growth **24%**

Steady enterprise adoption continues

Managed Services **5%**

Declining as companies seek control

Data Sovereignty

Regulatory pressure and competitive advantage demand full control over data location and access.

Private AI Infrastructure

Organizations need to deploy LLMs and AI workloads without sending data to third-party APIs.

Open Source Preference

Avoiding vendor lock-in while gaining flexibility, transparency, and community innovation.

The challenge: How to get the speed of managed services while maintaining sovereignty and control?

The Strategic Choice

Enterprises face a false dilemma. Stacktic offers a third path.

		RECOMMENDED
	Managed Services AWS, Azure, GCP	
✓ Fast initial deployment ✓ Managed operations ✗ 30-50% lock-in premium ✗ Zero negotiation leverage ✗ Data sovereignty concerns	DIY Open Source Self-Managed ✓ Full control & flexibility ✓ No licensing costs ✗ Months to production ✗ Requires specialized talent ✗ Growing operational burden	Stacktic The Third Way ✓ Speed of managed services ✓ Control of open source ✓ True cloud portability ✓ Vendor negotiation power ✓ Complete data sovereignty
TRAPPED BY CONVENIENCE	DROWNED IN COMPLEXITY	BEST OF BOTH WORLDS

Stacktic enables migration to any cloud with minimal effort

A credible exit strategy unlocks **15-30% better rates** from vendors who know you can leave

Automate 90% of Operations

Engineers spend 90% of their time on infrastructure plumbing instead of building business value. Stacktic automates the entire stack lifecycle.

0

Day 0: Architecture

Hours instead of months

1

Day 1: Deployment

One-click to any Kubernetes

2

Day 2: Operations

Automated upgrades, security, rollbacks

Board Recommendation

Strategic objectives and expected outcomes

STRATEGIC OBJECTIVE	ACTION	EXPECTED OUTCOME
 Eliminate Technical Debt	Adopt Central Control Plane	Retire legacy systems, reduce maintenance burden
 Mitigate Key Person Risk	Encode operational knowledge	Zero dependency on tribal knowledge
 Maximize ROI	Automate Day-2 operations	30% infra savings, 70% labor efficiency
 Enable Cloud Portability	Multi-cloud architecture	Negotiate better rates, avoid lock-in
 Strengthen Vendor Leverage	Credible exit strategy	15-30% cloud cost reduction
 Accelerate Innovation	Redirect engineering focus	90% time on features, not infrastructure
 AI-Native Foundation	Open source AI stack	Deploy AI/ML without vendor dependencies

15-30%

Cloud Savings via
Negotiation

Zero

Migration Lock-in Risk

Any Cloud

AWS, Azure, GCP, On-Prem

Additional Value

Eliminate Legacy

Automated migration + versioning

→ Modernize Forever

Lower Infrastructure

Cloud-agnostic platform

→ Reduce Spend 30%+

Avoid Vendor Costs

Replace commercial tools with OSS

→ No Licensing, No Lock-in

True Portability

Move across clouds, on-prem, edge

→ With a Few Clicks

Unified Support

Single support for all OSS components

→ One Contract, All Components

Security & Compliance

Built-in scanning & CISO reports

→ Audit-Ready Day One

Who Should Use Stacktic

Two primary use cases with exceptional fit

Regulated & High-Security Organizations

Finance, Healthcare, Government, Defense

Organizations with strict compliance requirements that need complete control over their infrastructure and data.

- ✓ **Air-Gapped Deployments**
Complete network isolation with full functionality
- ✓ **Private AI Infrastructure**
Deploy LLMs and AI workloads without external dependencies
- ✓ **Complex Multi-Stack Architectures**
Manage interconnected systems with full governance
- ✓ **Compliance Ready**
HIPAA, PCI-DSS, SOC2, FedRAMP compatible

Key Benefit

100% data sovereignty with enterprise-grade automation

Startups & Fast-Moving Teams

Series A-C, Scale-ups, Innovation Labs

Teams that need to ship production-ready infrastructure without hiring large DevOps teams.

- ✓ **Fastest Path to Production**
Complex stacks deployed in hours, not months
- ✓ **Minimal Ops Overhead**
90% automation means lean teams can scale
- ✓ **Enterprise-Grade from Day One**
Security, observability, and compliance built-in
- ✓ **No Infrastructure Debt**
Start right, scale without rewriting

Key Benefit

Ship faster than competitors at a fraction of the cost

Investment Options

Scalable pricing aligned with business growth

Start Point

MVP & Validation

- ✓ 1 Full Stack
- ✓ 5 Users
- ✓ Full Day 0-2 Automation

POPULAR

Scale

Platform Teams

- ✓ **10 Stacks**
- ✓ 30 Users
- ✓ Private SaaS Option
- ✓ Advanced SecOps Automated

Enterprise App Factory

Fleet Management

- ✓ 100+ Stacks
- ✓ Unlimited Users
- ✓ Dedicated Engineer
- ✓ Customized Automation Platform

Next Steps

Initiate a pilot migration for your core AI stack and validate the ROI firsthand.
