

● PLATFORM ENGINEERING SOLUTION

STACKTIC

// Automating **Stack Relationships** from Day 0 to Day 2

The "Third Way": Speed of Managed Services + Control of Open
Source + Full Sovereignty

// The Market Shift to Open Source

Enterprises are prioritizing **Data Sovereignty** and **AI Readiness** over vendor loyalty. The market is aggressively moving away from locked-in managed services toward AI-native Open Source.

MANAGED SERVICES

Declining as companies seek control

\$ STACKTIC ANALYZE --MARKET

// The Relationship Problem

Every component connects to **everything else**. Services, databases, clouds, tools, APIs—it's all relationships.

The "Plumbing" Trap

Engineers don't write business logic. They configure Service ↔ Database ↔ Auth ↔ Observability ↔ Cloud.

Complexity = $n(n-1)$

Every new service creates exponential configuration overhead. Manual config leads to human error.

Trapped by Bad Options

Managed services = lock-in & premium costs. DIY Kubernetes = operational burden & skill gap.

ENGINEERING RESOURCE ALLOCATION

Innovation & Business Logic

Manual Plumbing & Config

TARGET FOR OUT-OF-THE-BOX AUTOMATION

```
$ stacktic solve --automation
```

Stacktic Automates the Puzzle

Stacktic is a **logic framework** that understands the **topology** of your stack. One connection drawn in our UI creates the entire relationship ecosystem—Policies, Secrets, Networking, Observability—automatically.

- 0 Day 0:** Architecture & Dependency Mapping (hours, not months)
- 1 Day 1:** One-click Deployment to any Kubernetes cluster
- 2 Day 2:** Upgrades, Rollbacks, Security & Operations automated

Version Everything

Save entire stack as snapshot. Rollback instantly.

Security Automation

Secrets, certs, policies, RBAC—all generated.

// A **savings** story, **not** a spend story

return calculate_roi(stacktic)

70%+

COST REDUCTION

Deployment costs slashed through automation of Ops, DevOps, SRE.

80%

FASTER TO MARKET

Day-0 planning: from months to hours. Accelerated revenue capture.

Zero

VENDOR LOCK-IN

Full sovereignty. AWS to Azure to On-Prem with zero code changes.

100%

SOVEREIGNTY

Your data, your rules. Air-gapped ready. Full compliance support.

ENTERPRISE COST COMPARISON (ANNUAL)

// Significant additional_value

eliminate_legacy()

Automated migration + versioning

modernize forever

lower_infrastructure()

Cloud-agnostic platform engineering

reduce spend 30%+

true_portability()

Move across clouds, on-prem, edge

with a few clicks

avoid_vendor_costs()

Replace commercial tools with OSS

no licensing, no lock-in

unified_support()

Single support for all OSS components

one contract, all components

security_compliance()

Built-in security scanning & CISO reports

audit-ready day one

// Who Should Use Stacktic?

Migration-Ready Companies

Transition managed services to Kubernetes swiftly with minimal effort.

Kubernetes Veterans

Enhance your stack and security while streamlining operations.

B2B Providers

Containerize applications into enterprise-grade production stacks for clients.

Resource-Conscious SMBs

Get enterprise capabilities without the budget for large DevOps teams.

Large Enterprises

Application factory platform to optimize costs and boost revenue at scale.

Sovereignty-First Orgs

Air-gapped, compliance-ready deployments with full data control.

The "App Factory" Model

Stacktic scales with you. From a single stack to a centralized engine managing your entire fleet with governance, security policies, and version control baked in.
